

LSSB2692ST

42" Built-In Side-By-Side Refrigerator

Style and Design

- Pro-Style Built-In Design with Seamless Finishing in Every Edge and Corner
- 25.6 cu.ft. Ultra Large Capacity
- Premium Finish in Stainless Steel Clad Type
- Tall Ice and Water Dispenser with SmoothTouch Control
- Premium LED Interior Surrounding Light
- Studio Style Handles

Organization

- 5 Tempered Glass Shelves and 3 Crisper Bins in the Refrigerator
- Side by Side Refrigerator with SpacePlus® Ice System
- 4 Fridge Door Baskets and 2 freezer Door Bins

Performance

- Linear Compressor: 10 Year Warranty
- ENERGY STAR® Qualified
- Fresh Air Filter
- Multi-Air-Flow™ Technology
- Premium Water Filtration System
- Electronic Temperature Controls
- SmartDiagnosis™
- LoDecibel™ Quiet Operation
- Soft Closing Door Hinge

Stainless Steel

Pro-Style Design

This built-in refrigerator makes a statement in any kitchen. This refrigerator boasts premium design details inside and out—like stainless steel backing on the tall ice and water dispenser®, LED lighting that brightens the interior, and sleek wave door handles unique to the LG Studio line.

Ultra Large Capacity

With the ultra-large capacity at 26.5 cu.ft., you can store more food than ever before. And keep it all fresher, longer.

Tall Ice and Water Dispenser®

The Ice & Water Dispenser® in this LG refrigerator is one of the tallest around in its class, measuring in at 9.2 inches. From pitchers to pint glasses, finally an ice and water dispenser that can accommodate just about any container.

Fast and Flexible

Tall item to store in the door? Easy moving door bins slide up and down with minimal effort—so you can quickly adjust storage on the fly.

Maximum Shelf Space

Ice makers are great, but not if it means you can't fit all of your food in the fridge. Located on the freezer door, the ingenious SpacePlus® ice system offers easy access to ice when you need it while freeing shelf space for additional storage.

Save Money. Save Energy.

When your refrigerator uses at least 20% less energy than required by federal standards, you're going to make an impact—on your energy bill, your energy consumption, and most importantly, the environment.
