### Installing under counter / stand alone

\* No Exterior Ventilation required

\* Cold water hook-up via 4ft. long hose located at back top

# SPECIFICATIONS – HOSES & CONNECTIONS

## COMBI-110

### Hoses and Connections - Installing the appliance in a narrow space

- Installing the laundry appliance in a narrow space may bend or crush the connections (hoses, power cord). Take great care in order to reduce the possibility of damaging the connections when installing or removing the appliance.
- A through hole with a diameter of at least 10 cm (4") is required to pass the hoses and power cord. Make sure there are no rough edges that could damage the power cord or hoses. If the laundry appliance is installed in a metal unit protect the edge of the through hole for the hoses and power cord with a gasket. Do not use extension cords when making the electrical connection.

# Porter & Charles

Porter & Charles Appliances are designed and manufactured to the highest standards. Each appliance is covered by a comprehensive 2-year parts and labour warranty.

Refer to product warranty policy for complete terms and conditions.
