SOFIA 48" PRO INDUCTION RANGE - ALL GLASS

F6PIR487S1

This elegantly designed 48" induction range is our first all-electric pro range alternative for those who do

not have access to gas or choose to go full electric. The cooking surface features 7 powerful premium European inductors under a continues piece of ceramic glass adding to the elegant design. Not only does this layout feature the same beloved configuration of our 36" induction range but includes a

dedicated bridge element, which when put into bridge function, allows one to combine both induction zones into one large zone for use with specialty cookware or an induction-capable griddle. The instant

response and precise control of the induction are ensured by the presence of professional control knobs. Below the cooking surface, two self-cleaning true convection ovens with intuitive multiple baking and broiling functions and the convenience of telescoping racks encourage you to cook the way you

Easy Clean Ceramic Glass

Dual Max Power

Bridge Zone

Power Boost Burner

Pan Detection system

Residual Heat Sensor

Dual True Convection (main oven)

Single True Convection (accessory oven)

SPECIFICATIONS

COOKING SURFACE

Seven powerful premium European inductors

RAL 3003

- 4 Single Induction cooking zones
- 1 Dual Max Power with Ø 11" cooking zone

2 Bridge Zone Elements (griddle function)

Elegant Ceramic glass surface

Booster function for each cooking zone
Residual heat and Power-on Indicators

Digital Minute Minder / Pot Detection System

Child Lock Function

Automatic Heat-up

OVEN

Dual True Convection in main oven and True Convection in accessory oven Self-cleaning oven with Multifunction baking Black Porcelain enamel interior Cool to the touch soft closing doors

Extra-large baking cavity and viewing area

- 3 Halogen lights on main oven
- 2 Halogen light on accessory oven
- 2 Chrome racks per oven
- 1 Telescopic rack per oven
- 1 Meat probe

Gross capacity 4.4 cu. ft. and 2.7 cu.ft

OVEN FUNCTIONS

Bake Broil

Roast

True Convection

Warm / Proof / Dehydrate

Meat Probe

Self-Clean

DIMENSIONS - CUTOUT REQUIREMENTS

FULGOR MILANO Page 3 of 4

INSTALLATION REQUIREMENTS

For detailed installation specifications consult the installation requirements page or each single product installation manual.

Ensure your installation also complies with local and national building and fire codes.

FLUSH ISLAND TRIM INSTALLATION

For island installation, maintain 2-1/2 inch minimum from cutout back edge of countertop and 3 inch minimum from cutout to side edges of countertop (see view).

ELECTRICAL REQUIREMENTS					
ELECTRICAL SUPPLY	SERVICE	POWER CONNECTION			
120/240 V - 60 Hz 20.3 kW 84.6 A* 120/208 V - 60 Hz 17.6 kW 84.6 A*	50 Ampere dedicated circuit	NEMA 14-50P			

POWER MANAGEMENT SYSTEM		
Power Management Area		A A
A B	Decreases by 4/5 Levels Decreases by 1/2 Levels	BB

*Considering all the power consuming features of this appliance; the theoretical potential cumulative power draw could exceed the required circuit breaker rating of 50 amps. We must stress that under normal expected daily usage, the probability of this ever happening is exceptionally low. Such a power draw would require that both ovens are operating and all surface elements have been set to their maximum settings simultaneously.

This model is equipped with a Fulgor Milano proprietary Power Management System that will prevent the tripping of circuit breakers in the event of an extreme power use scenario.

The system is designed so in the event that 50 amps total draw is exceeded for several minutes, it will enter into 'POWER MANAGEMENT' mode in which case 4 of the 5 surface induction elements of the main cooking area will be temporarily reduced in their setting in accordance to the above diagram and description: the rear inductors' settings will be reduced by 4 or 5 levels and the front inductors will be reduced by 1 or 2 levels.

The amount of reduction will be determined by the current power draw at the time the system is engaged. Additionally, any active BOOST and AUTOMATIC HEAT UP functions in this region will be turned OFF to reduce power draw.

You will note that the symbol 'POWER MANAGEMENT' will illuminate on the cooking surface during this time. Functionality of the ovens and of the two left-most induction elements will remain unaffected and the central double induction element will still be able to maintain a power level setting of 9.

Once the total power draw drops below 42 amps for 30 seconds, the cooktop will return to its full operational ability and previous settings will be restored automatically except for BOOST or AUTOMATIC HEAT UP which would need to be reinitiated if so desired. Again, it is highly unlikely you will ever see the Power Management system engaged during normal daily use.

Specification sheets are for planning purposes only. Always refer to installation instructions, always consult the countertop fabricator/supplier prior to determining counter opening. Consult your HVAC engineer for your specific ventilation requirements. Always refer to installation instructions accompanying product or on available on www.fulgor-milano.com/us/en for your specific model number. Fulgor Milano retains the right to change product specifications or design without notice.
